Presentación

Como parte del seguimiento epidemiológico del consumo de drogas en pacientes de primer ingreso a tratamiento en Centros de Integración Juvenil (CIJ), el presente documento presenta la actualización de las tendencias observadas en el **consumo alguna vez en la vida** de los usuarios de drogas ilícitas que ingresaron entre el primer semestre de 2008 y el primer semestre de 2018.

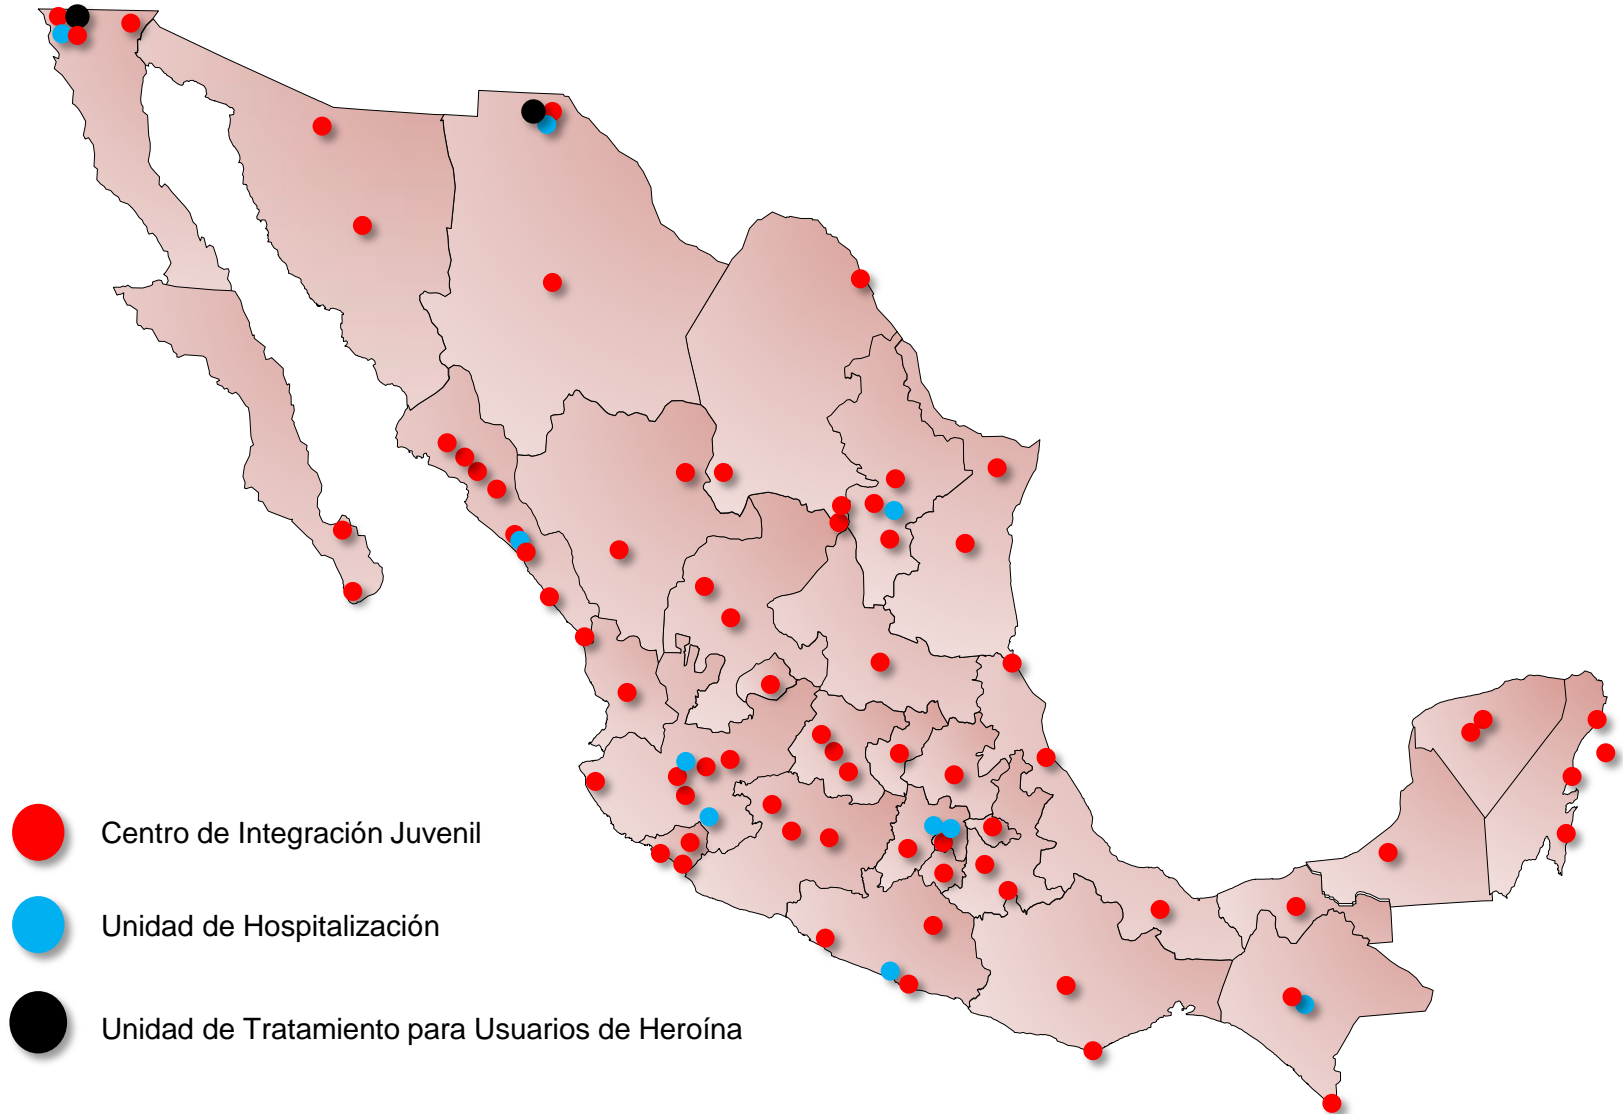

Los datos se obtuvieron del formato de “Entrevista Inicial” del Expediente Clínico abierto a cada usuario de drogas que ingresa por primera vez a tratamiento a CIJ. El registro de la información lo realiza el personal del Equipo Médico Técnico designado para ello en cada una de las unidades de atención. Cabe señalar que en el CIJ La Piedad la información de la entrevista inicial se registra en formato físico y la captura electrónica de la información la efectúa personal del área de investigación responsable del proyecto.

La información que se presenta es a nivel nacional y para cada una de las entidades federativas en las que CIJ cuenta con al menos una unidad operativa y donde se brinda el servicio de tratamiento.

Las drogas que se incluyen en las tendencias del consumo son: tabaco, alcohol, cannabis, inhalables, cocaína en polvo, crack, metanfetaminas, MDMA (Éxtasis) y otras metanfetaminas alucinógenas, benzodiazepinas (incluye Royhpnol), heroína y alucinógenos.

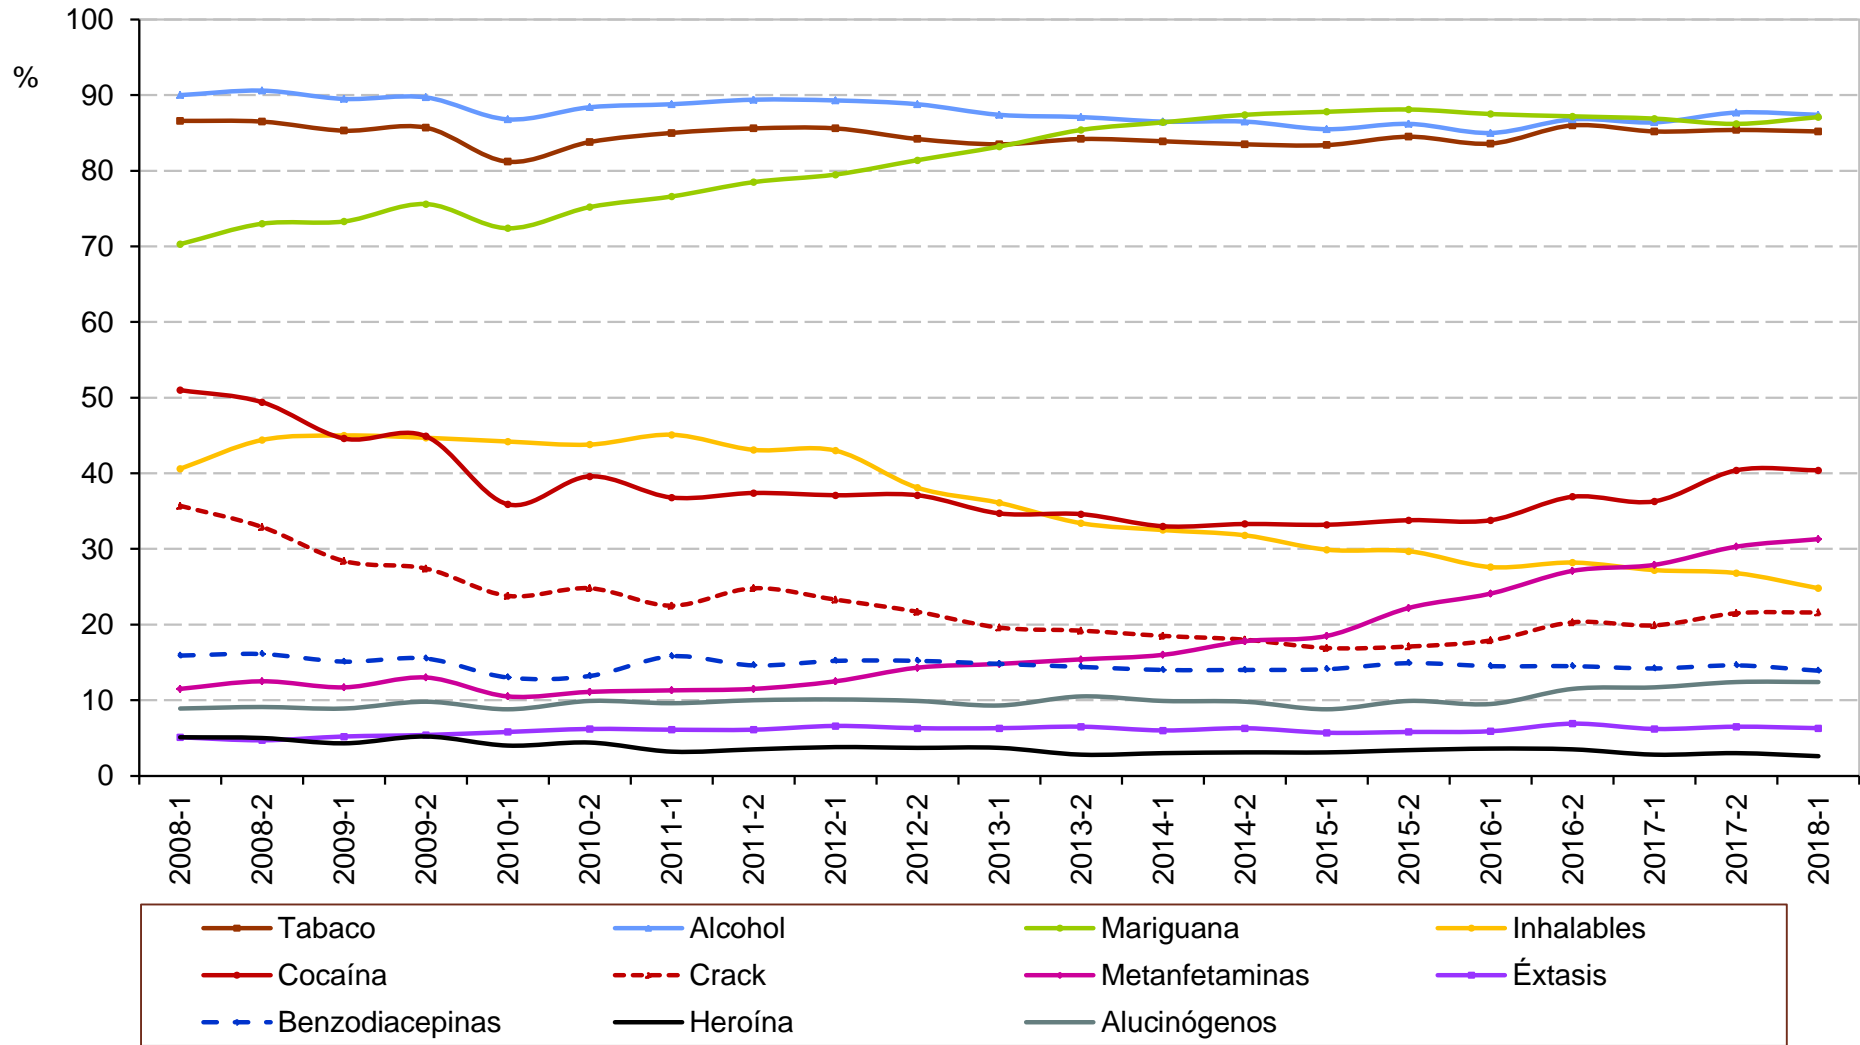

Las tendencias registradas en el consumo de drogas en el primer semestre de 2010 puede ser reflejo del ajuste realizado en el formato de «Entrevista Inicial» utilizado para la obtención de la información y de la implementación del expediente a un sistema electrónico.

Unidades de atención
